

VOLUNTEER

FIRST Tech Challenge

*"Tell me and I'll forget;
Show me and I may remember;
Involve me and I'll understand."*

FIRST Tech Challenge makes the connection for our young people that engineering is "cool" and fun!

What's Involved?

Game Referee

The referee will observe the robot game match closely and "score" the team based on the game rules.

Judge

Judges evaluate all aspects of a team: Robot Design, Design Notebook, Teamwork and Outreach. FIRST values including Gracious Professionalism are an important aspect.

Field and Pit Crew

Volunteers include game control and technical advisors, field traffic managers as well as crew to manage the team pit areas

Robot Inspector

Inspectors are responsible for checking robot hardware and software to make sure that the game rules are followed for safety, allowable parts and correct software templates

We need adult volunteers to give their time to celebrate the kids' achievements.

Time commitment: training of approx. two hours plus tournament day

It's FUN!

Info about 2009 tournaments coming soon!
